

This is the left column.

It has multiple lines.

We want to test that the XY-cut algorithm
reads the left column fully before moving to the right.

Numbered list:

1. First item
2. Second item
 - a. Sub-item
 - b. Another sub-item
3. Third item

This is the right column.

It also has multiple lines.

And a warning:

WARNING: This is a warning.

Note: This is a note.

Footnote-like text (smaller font size will be set via
